Term End Examination

Dec 2023

CET2012B - Data Engineering Concepts

Question Paper ID: 027176

Faculty/School	Engineering and Technology	Term	Semester V
Program	TY B.Tech CSE	Duration	2 Hours 30 Minutes
Specialization		Max. Marks	70

Answer any 7 questions.

Each question has 10 marks.

Assume suitable data if necessary.

Draw appropriate diagrams if applicable.

Section - 1 (7 X 10 Marks)

Answer any 7 questions

1	Classify the following attributes as binary, discrete, or continuous. Also classify them as qualitative (nominal or ordinal) or quantitative (interval or ratio). Some cases may have more than one interpretation, so briefly indicate your reasoning if you think there may be some ambiguity 1. Time in terms of AM or PM. 2. Brightness as measured by a light meter. 3. Brightness as measured by people's judgments. 4. Angles as measured in degrees between 0° and 360° 5. Bronze, Silver, and Gold medals as awarded at the Olympics. 6. Height above sea level. 7. Number of patients in a hospital. 8. ISBN numbers for books. 9. Number of local calls in a month 10. Price of your textbook	10 marks	CO1	Understanding
2	A. Distinguish between noise and outliers. How to detect outliers using interquartile range (IQR) B. Calculate Interquartile Range (IQR) for the given sample size 62,63,64,64,70,72,76,77,81,81	10 marks	CO1	Understanding
31	Consider the data warehouse of the train application. Draw a star schema and snowflake schema for the data warehouse with hierarchies for the Passenger, train, date and station dimensions.	10 marks	CO3	Applying

4, 5, 6, 9, 11, 20

4	A! Explain the role of Metadata in Data Warehouse . B. Elaborate the three perspectives of data warehouse metadata.	10 marks	CO3	Understanding																																				
5	AI Explain the need of data warehouse from business analyst perceptive. B. Discuss, how designing data warehouses is very different from designing traditional operational systems?	10 marks	CO3	Remembering																																				
6	Write a pseudocode of Apriori Algorithm. Discuss following basic concepts of Apriori Algorithm 1. Frequent Itemsets 2. Support, Confidence 3. Join Operation 4. Prune Operation 5. Association rule generation	10 marks	CO4	Evaluating																																				
7 +	Suppose that the data mining task is to cluster points (with (x, y) representing location) into three clusters, where the points are A1(2,10),A2(2,5),A3(8,4),B1(5,8),B2(7,5),B3(6,4),C1(1,2),C2(4,9). The distance function is Euclidean distance. Suppose initially we assign A1, B1, and C1 as the center of each cluster, respectively. Use the k-means algorithm to show only (a) The three cluster centers after the first round of execution. (b) The final three clusters	10 marks	CO4	Remembering																																				
8	A. Why do we use Decision Trees in Data Mining? Give advantages and disadvantages of Decision Trees in Data Mining? B. Suppose we have a dataset of students and whether they passed or failed based on two features: "Study Hours" and "Attendance." <table border="1"><thead><tr><th>Student</th><th>Study Hours</th><th>Attendance</th><th>Passed</th></tr></thead><tbody><tr><td>1</td><td>2</td><td>Low</td><td>No</td></tr><tr><td>2</td><td>3</td><td>High</td><td>No</td></tr><tr><td>3</td><td>5</td><td>High</td><td>Yes</td></tr><tr><td>4</td><td>1</td><td>Low</td><td>No</td></tr><tr><td>5</td><td>4</td><td>High</td><td>Yes</td></tr><tr><td>6</td><td>2</td><td>Low</td><td>No</td></tr><tr><td>7</td><td>6</td><td>High</td><td>Yes</td></tr><tr><td>8</td><td>3</td><td>Low</td><td>No</td></tr></tbody></table> <ul style="list-style-type: none">• Calculate the entropy for the whole dataset.• Evaluate the information gain for Study Hours and Attendance.	Student	Study Hours	Attendance	Passed	1	2	Low	No	2	3	High	No	3	5	High	Yes	4	1	Low	No	5	4	High	Yes	6	2	Low	No	7	6	High	Yes	8	3	Low	No	10 marks	CO4	Remembering
Student	Study Hours	Attendance	Passed																																					
1	2	Low	No																																					
2	3	High	No																																					
3	5	High	Yes																																					
4	1	Low	No																																					
5	4	High	Yes																																					
6	2	Low	No																																					
7	6	High	Yes																																					
8	3	Low	No																																					

9	Justify is Apriori algorithm supervised or unsupervised? Apply apriori algorithm to the following data set Given: Minimum support value is 0.3, Confidence Threshold is 60%	10 marks		remembering																																																												
	<table><tr><th>Transaction ID</th><th>Item purchased</th></tr><tr><td>101</td><td>Strawberry, <u>L</u>itchi, Orange</td></tr><tr><td>102</td><td>Strawberry, Butterr fruit</td></tr><tr><td>103</td><td>Butter fruit, Vanilla</td></tr><tr><td>104</td><td>Strawberry, <u>L</u>itchi, Orange</td></tr><tr><td>105</td><td>Banana, Orange</td></tr><tr><td>106</td><td>Banana</td></tr><tr><td>107</td><td>Banana, Butter fruit</td></tr><tr><td>108</td><td>Strawberry, <u>L</u>itchi, Apple, Orange</td></tr><tr><td>109</td><td>Apple, Vanilla</td></tr><tr><td>110</td><td>Strawberry, <u>L</u>itchi</td></tr></table>	Transaction ID	Item purchased	101	Strawberry, <u>L</u> itchi, Orange	102	Strawberry, Butterr fruit	103	Butter fruit, Vanilla	104	Strawberry, <u>L</u> itchi, Orange	105	Banana, Orange	106	Banana	107	Banana, Butter fruit	108	Strawberry, <u>L</u> itchi, Apple, Orange	109	Apple, Vanilla	110	Strawberry, <u>L</u> itchi

110	Strawberry, <u>L</u> itchi																																																															
10	<p>Briefly outline the major steps of Decision Tree(DT) classification.</p> <p>Draw the Decision Tree and illustrate the steps with the help of below given example. The following table consists of training data from an employee database. The data have been generalized. For example, “31 ... 35” for age represents the age range of 31 to 35. For a given row entry, count represents the number of data tuples having the values for department, status, age, and salary given in that row.</p> <table><tr><th>department</th><th>status</th><th>age</th><th>salary</th><th>count</th></tr><tr><td>sales</td><td>senior</td><td>31...35</td><td>46K...50K</td><td>30</td></tr><tr><td>sales</td><td>junior</td><td>26...30</td><td>26K...30K</td><td>40</td></tr><tr><td>sales</td><td>junior</td><td>31...35</td><td>31K...35K</td><td>40</td></tr><tr><td>systems</td><td>junior</td><td>21...25</td><td>46K...50K</td><td>20</td></tr><tr><td>systems</td><td>senior</td><td>31...35</td><td>66K...70K</td><td>5</td></tr><tr><td>systems</td><td>junior</td><td>26...30</td><td>46K...50K</td><td>3</td></tr><tr><td>systems</td><td>senior</td><td>41...45</td><td>66K...70K</td><td>3</td></tr><tr><td>marketing</td><td>senior</td><td>36...40</td><td>46K...50K</td><td>10</td></tr><tr><td>marketing</td><td>junior</td><td>31...35</td><td>41K...45K</td><td>4</td></tr><tr><td>secretary</td><td>senior</td><td>46...50</td><td>36K...40K</td><td>4</td></tr><tr><td>secretary</td><td>junior</td><td>26...30</td><td>26K...30K</td><td>6</td></tr></table>	department	status	age	salary	count	sales	senior	31...35	46K...50K	30	sales	junior	26...30	26K...30K	40	sales	junior	31...35	31K...35K	40	systems	junior	21...25	46K...50K	20	systems	senior	31...35	66K...70K	5	systems	junior	26...30	46K...50K	3	systems	senior	41...45	66K...70K	3	marketing	senior	36...40	46K...50K	10	marketing	junior	31...35	41K...45K	4	secretary	senior	46...50	36K...40K	4	secretary	junior	26...30	26K...30K	6	10 marks	CO4	Evaluating
